

FLEETBROADBAND MULTI-VOICE

FleetBroadband Multi-Voice is an enhanced capability that allows a single FleetBroadband terminal to make up-to nine concurrent voice calls.

FLEETBROADBAND MULTI-VOICE

FleetBroadband Multi-Voice is an enhancement to the Inmarsat FleetBroadband solution, enabling users to initiate up to nine simultaneous calls using a single terminal. Integrated into the Inmarsat core network, it provides the same excellent voice quality as FleetBroadband.

FleetBroadband Multi-Voice is particularly advantageous for vessels requiring multiple voice lines, offering a tailored solution based on specific vessel needs. For instance, users can designate the bridge phone as the primary inbound calling unit, optimising communication flow.

Crew members can use pre-paid cards for personal calls outside the bridge area, preserving their privacy and mitigating potential disruption to critical vessel operations.

TYPICAL APPLICATIONS

When activating **FleetBroadband Multi-Voice**, users can choose between Standard and Enhanced options:

Standard FleetBroadband Multi-Voice

Includes three additional lines, allowing a total of four simultaneous voice calls.

Enhanced FleetBroadband Multi-Voice

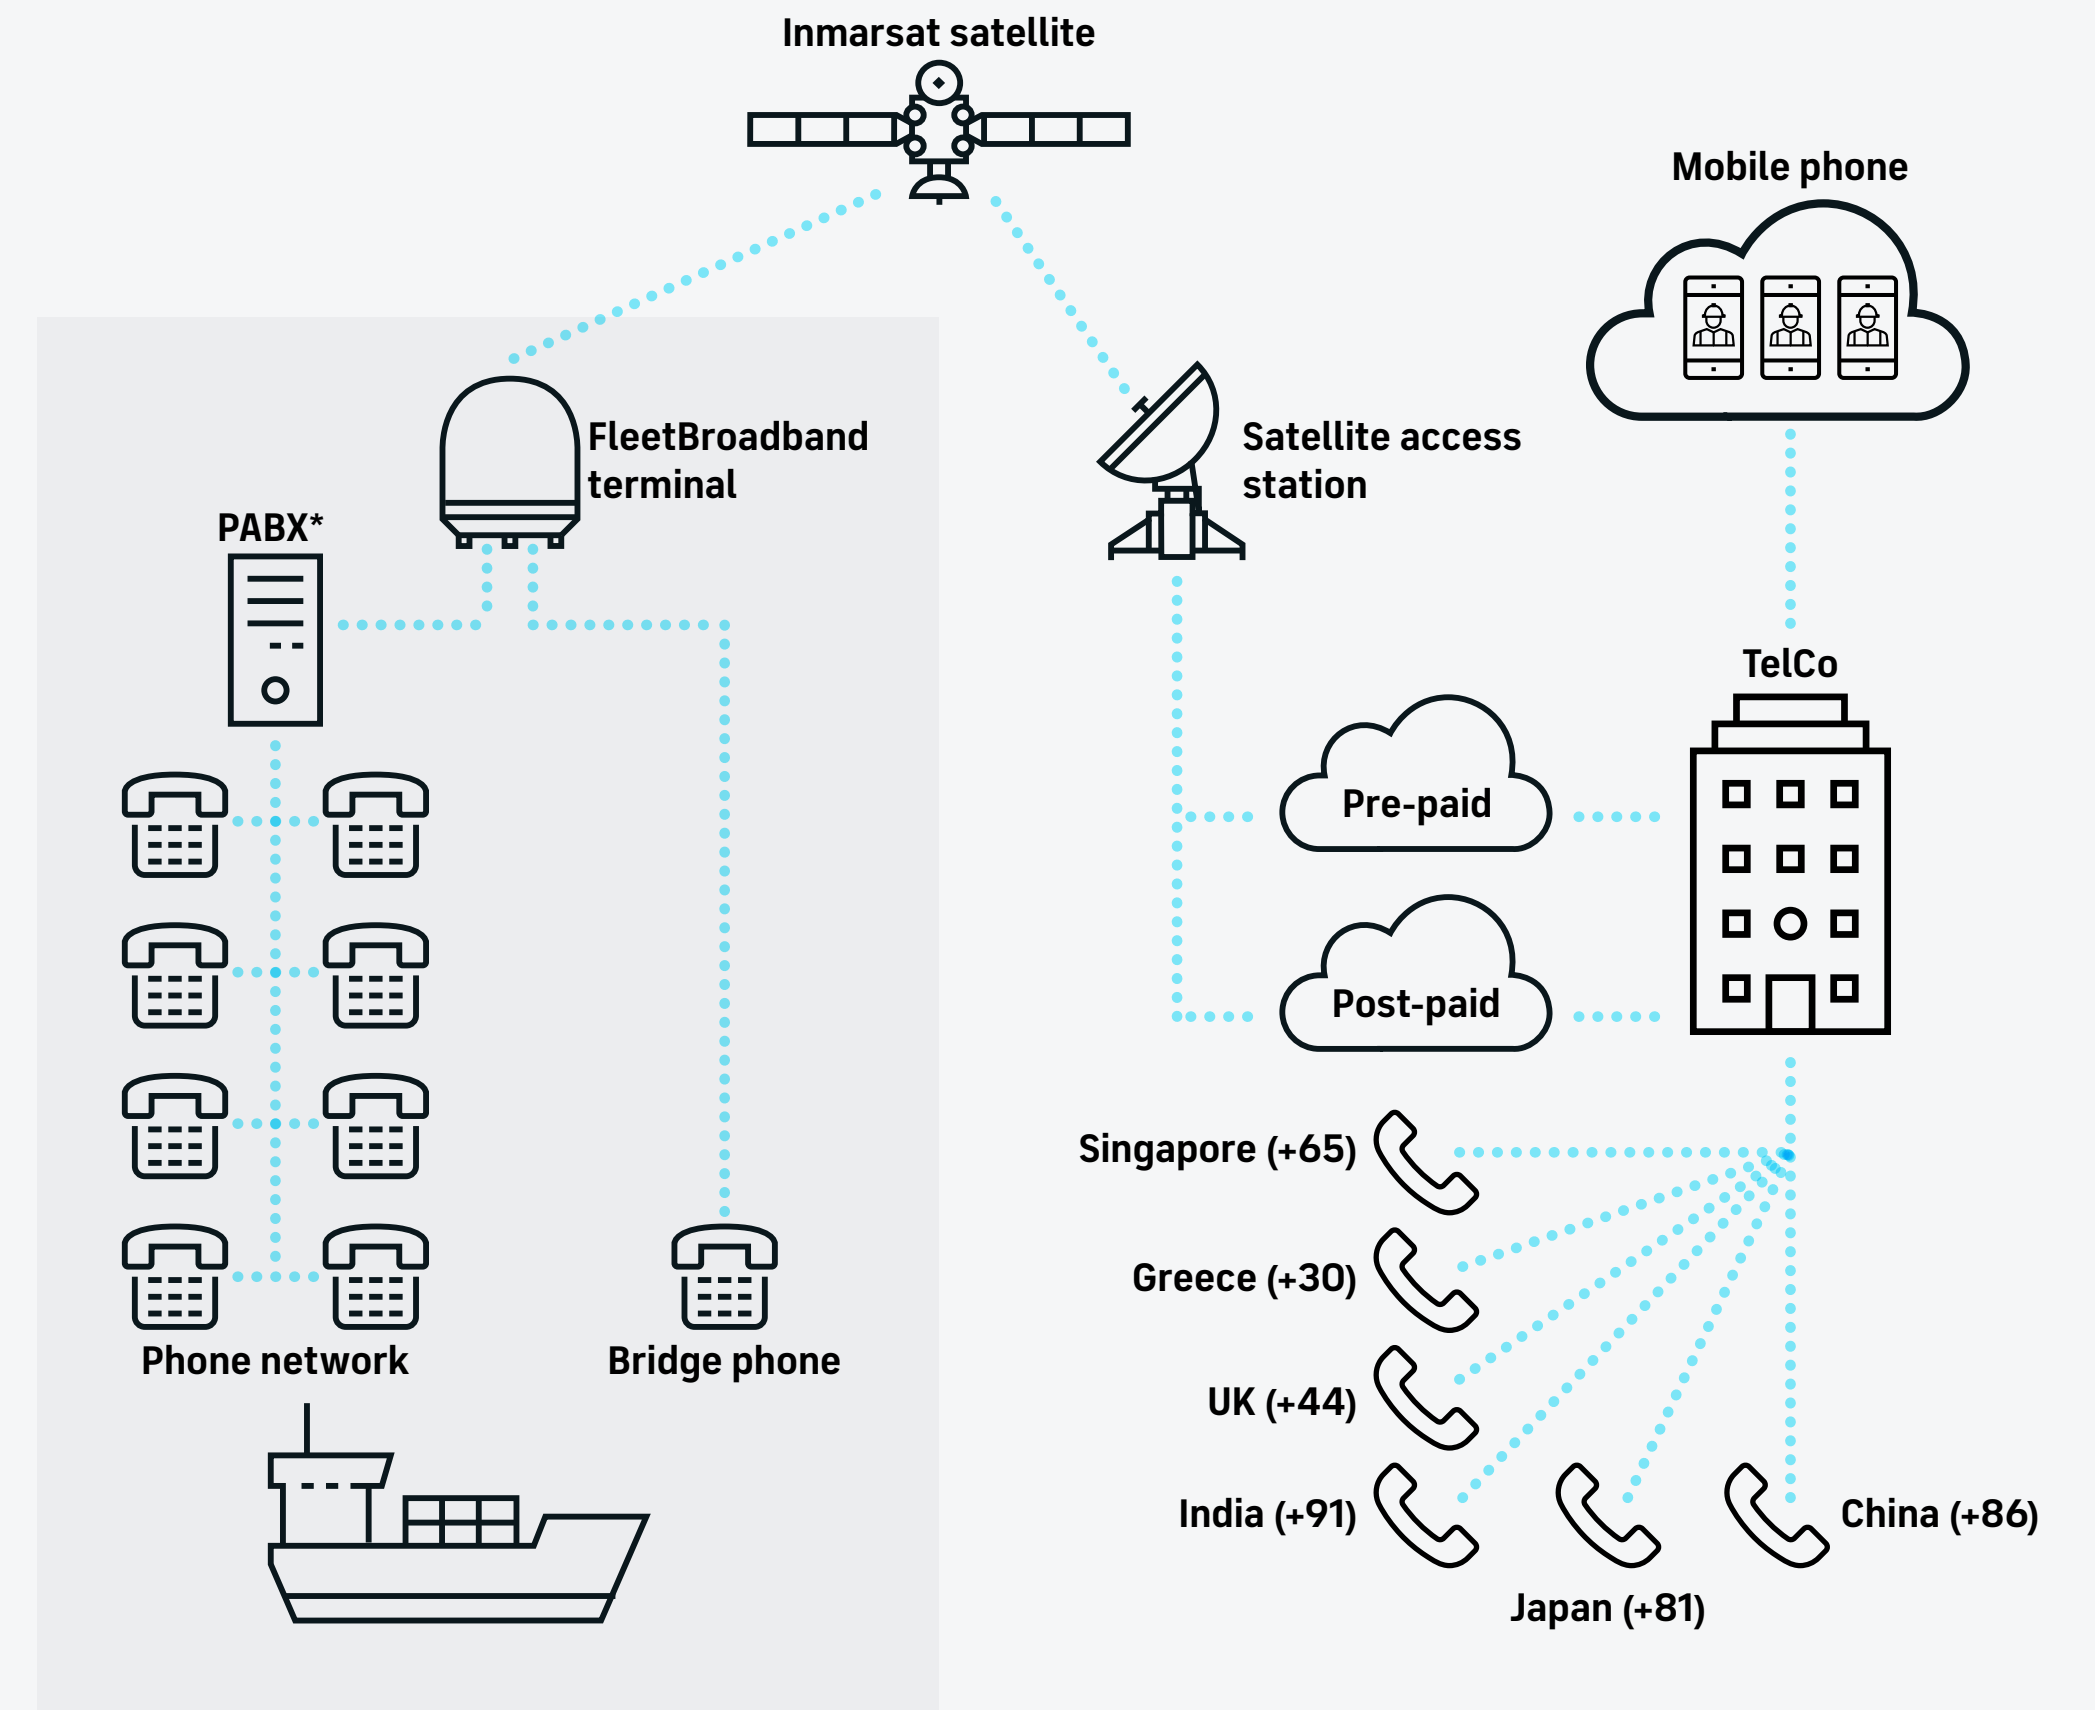

Provides up to eight additional lines, enabling a total of up to nine simultaneous voice calls.

KEY BENEFITS

-  Segregation of crew personal calls from operational communications
-  Enhanced crew calling with simplified access
-  Simultaneous multiple calling, enabling up to nine voice connections
-  Competitive pricing for globally terminated calls
-  Access to both pre-pay and post-pay calling options
-  Service compatibility with FleetBroadband 250 and 500
-  Availability of individual MSISDN* in call data records
-  Utilisation of end-to-end Inmarsat numbering and routing schemes (+870)
